EDUCATION

- **Shri Shankaracharya Technical Campus**   Bhilai, IN
  Bachelor of Technology in Information Technology; GPA: 3.26 (7.7/10.0)   *Aug. 2019 − July 2023*

EXPERIENCE

- **Pillar Project Worldwide Limited** | **pillar.fi**   Remote, London & Wales, ENG
  Junior Frontend Developer   *June 2022 - Nov 2022*
  - ○ **Languages & Tools:** TypeScript, Next.js, React, Blocknative, Web3, Etherspot SDK, Zeplin, Linear App
  - ○ Agile mode, UK estimation, take part in agile ceremonies and daily dev standups
  - ○ **Etherspot Dashboard:** The Etherspot Dashboard is an all-in-one, EVM-compatible platform that allows users to interact seamlessly with multiple assets and protocols — all without having to switch networks.
    - * **Notifications:** Service for sending toast, push and in-app notifications involved in features such as transactions (send & deposit), network switch and authentication.
    - * **Data Visualization:** Representation of tokens to a whole of connected wallet in the form of the doughnut chart.
    - * **UI Optimization:** Developed loading state, Sentry Integration, Debugging dashboard & fixing bugs.
  - ○ **Pillar Staking Website:** A staking website to stake between 10,000 and 250,000 $PLR to be eligible to receive rewards, built using smart contract via ABI (Application Binary Interface) interaction. Tokens staked are locked for a minimum period of 1 year. Rewards are paid out in wETH.

- **Oibre Labs Private Limited** | **getmicro.co**   Remote, Bangalore, IN
  Software Engineering Intern   *April 2022 - July 2022*
  - ○ **Languages & Tools:** MongoDB, Express, Node, React, Tailwind CSS
  - ○ Worked on the Coming Soon page, Partner Portal and Beta Web Applications required for Fractional Investments
  - ○ Initiated Responsive Employee Management System (EMS)
  - ○ Collaborating with peers engineers & figma designers to solve technical problems and merge requests

PROGRAMMING SKILLS

- **Tools:** Vercel, Git, Railway, Linear, Zohodrive, Zeplin & Figma   **Languages:** Javascript, TypeScript & Python
- **Frameworks:** React, Node, Next, Tailwind & Bootstrap   **Cloud:** MongoDB Atlas & Google Cloud

PROJECTS

Boilerplate Web App | Vite + Firebase ⤴   Mar 2022
- This website was designed to streamline the app development process for developers by offering customizable layouts and a modern, user-friendly navigation bar. Its login, signup, calculator, and notification generator features enhance the user experience across multiple screens.
- **What I learnt:** Vanilla JavaScript, Local Storage, Strings, Arrays & their in-built methods

Weather App | React + Vite (pnpm) ⤴   Jan - Feb 2023
- Get the national and local weather temperature with longitude & latitude, implemented using OpenWeatherMap and Google Map API, Styled Components, Material UI & Icons.
- **What I learnt:** Global State Management and hooks such as useEffect, useState & useRef

EXTRACURRICULAR ACTIVITY

- **DEVSTRONS'** | **devstrons.org**   Community
  Community Founder   *July 2021 - Present*
  - ○ Mentored 500+ people while holding positions such as Postman Student Leader, CNCF Organizer, Hack Club Leader, and Blogger
  - ○ Introduced the first student-run debugging contest with a conference, BUGTRONS, to empower coders to get influenced by developing software, enhancing skills, eradicating bugs & the pursuit of new prospects.

- **Open Source Contributions**   Jan 2021 - Present
  - ○ fix: [Docs/Bug] Mobile view updated ⤴
  - ○ [Docs] mesheryctl pattern delete page added ⤴
